CAREER PROFILE

Full-stack developer building practical tools that improve user workflows and daily organisation. Experienced in Java (Spring Boot), React, and cloud-based technologies, with hands-on experience creating real-world applications from concept to deployment. Active in tech communities and growing as a founder and developer.

EDUCATION

University of the West of England, Bristol — BSc Computer Science   **Sep 2025 - Present**

Pietro Paleocapa State Scientific High School, Italy — Diploma di   **Sep 2019 - Jul 2024**
Esame di Stato
Final score: 76/100 │ Strong grades in English (9/10), Science (8/10), History (8/10), Maths

SKILLS

- **Languages & Frameworks:** Java (Spring Boot), JavaScript (ES6+), TypeScript, React, Next.js, HTML, CSS, Firebase
- **Databases & Tools:** MySQL, Supabase, Git/GitHub, Google Cloud, VS Code, IntelliJ, Slack
- **Other:** RESTful API design, Agile workflows, Software documentation
- **Soft Skills:** Problem solving, Adaptability, Teamwork, Initiative, Creativity
- **Certifications:** IELTS Academic — Overall Band 7.5

WORK EXPERIENCE

Software Developer — Digital Exhibition group(Remote)   **Jun 2025 - Present**

- Developed and deployed features for LOV3D, a platform with 2,170 active users across 29 countries, supporting both the main platform and the Digital Jewelry Week event.
- Implemented user interactions and media workflows for 158 digital jewels uploaded by global jewelry brands, like GemGenève, LegacyGem & Tracr (De Beers platform), and Mirror Jewelry.

Backend Developer (Java) — Coding Black Females   **July 2024- May 2025**

- Built gamified goal and task management API featuring 15+ REST endpoints, authentication, and XP progression logic.
- Designed and deployed custom Spring Data JPA query filters to retrieve user-specific tasks efficiently.
- Delivered the project following backend engineering practices, including endpoint documentation and JUnit unit tests to improve reliability.

Ambassador — Coding Black Females (Remote/Events)   **Jan 2025 – Present**

- Selected as part of the CBF Ambassador Network, a regional team supporting a wider community of 10,000+ Black women in tech across the UK.
- Contributed to organising 10+ community-led events and talks across ambassador regions, including hosting and speaking at South West sessions to support early-career developers.

PROJECTS & ACHIEVEMENTS

SelfSaga — Founder & Developer   **Present**

- Currently researching and designing an MVP for a gamified productivity platform focused on goal-tracking, XP systems and personal growth rituals.
- Built the initial backend prototype during the Coding Black Females fellowship, implementing authentication, XP logic and task/goal endpoints using Spring Boot and MySQL.
